

## **THE BEST OF BOTH WORLDS** *Outdoor-Ready Console with Touchscreen Functionality*

### **THE TMS4000 ADVANTAGE**

The TMS4000 automatic tank gauge is the industry's first touchscreen-based system that can be installed both indoors and outdoors, without the need for a secondary enclosure or additional heating/cooling systems. This capability not only lowers installation expenses, but it enables the TMS4000 to deliver long-lasting performance.

### **Viewing Your Most Critical Inventory & Compliance Data Is Easy**

A large, 10.4" color touchscreen displays real-time tank data in three user-friendly and user-configurable formats:

- ✓ Easy-to-read meters
- ✓ Detailed spreadsheet
- ✓ Quick-view bar graphs

Users can prioritize active or alarming tanks to display at the top of the window, and leak sensor statuses and alarm acknowledgement are just one click away.

### **Modular, Backwards-Compatible and Modern**

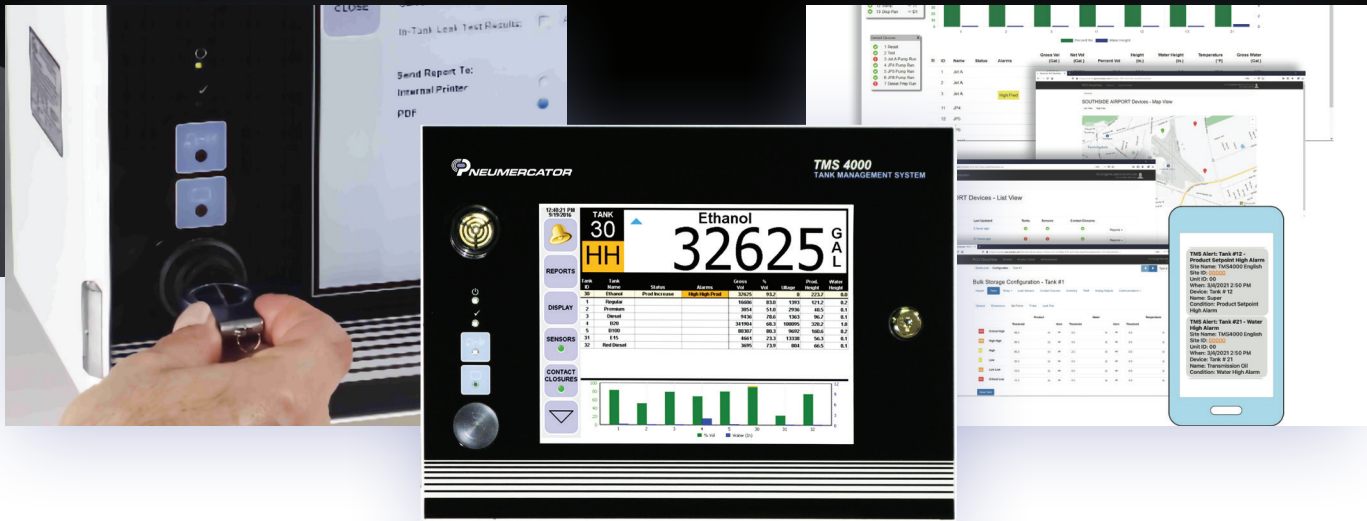

- ✓ Monitors up to 48 tanks
- ✓ Easily upgradeable from TMS2000 and TMS3000 — the TMS4000 works with existing Pneumercator probes, sensors and plug-in option cards
- ✓ Remote accessibility for real-time tank levels and alarms

# HIGHLIGHTS OF THE TMS4000 TANK MANAGEMENT SYSTEM

PRINT TO PDF

PCO CLOUDVIEW

## Extensive Inventory Monitoring Capacity

- Supports up to 48 mag probes, or varying combinations of level probes and leak sensors.
- Supports tank heights from 6" (200mm) to 70' (21M).
- Supports up to 16 Electronic Line Leak Sensors.

## High Performance and Reliability Standards

- Full glass touch screen is durable and clear. In outdoor installations, the tank gauge is glove-touchable and guaranteed not to fog.
- Lockable dust-proof enclosure is standard, weather-proof, corrosion-proof and panel-mount options are available.
- External weatherproof USB port available.

## Engineered to Lower Installation Costs

- Plug-In Relay I/O Cards provide seamless communication with other equipment, decreasing the need for additional components.
- Built-in industrial communication protocols reduce the need to install secondary equipment.

## User-Friendly Reporting and Notifications

- Optional printer is field-upgradeable.
- Landscape-format inventory reports.
- Inspector's report can be printed to a PDF file on a removable flash drive.
- Export Log Reports in CSV format.
- Supports E-mail and SMS text message alerts.

## Configuration Options Support Localized Operational Needs

- User-friendly system security settings allow administrators to control individual access levels.
- In-field localization settings include English, Spanish or French, with Metric or English units of measure.

## Accreditations and Certifications

- Third-party approved for In-Tank and Secondary Containment Leak Detection.
- UL/cUL approved.
