

4" (102 mm) Riser Mounting Kit with Quick-Release Cap for MP45xS/MP55xS Magnetostrictive Tank Gauging Probes

Product Description

The PK4-RM Riser Mount Probe Kit provides a “soft-mount” method of installation by allowing the probe to rest on the tank bottom and be stabilized within the tank riser without attachment. This method may be used for MP45xS/MP55xS series probe lengths up to 15 feet (4.6 m), providing easy installation and servicing by simply removing quick-release cap and lowering or raising probe by its cable. The cap accepts a padlock to prevent unauthorized access. The standard kit includes a 4” (102 mm) cap assembly with integral cable compression fitting, brass ferrule quick-release adapter, cable compression fitting for field junction box and wire splice kit.

IMPORTANT: Use PK2-DM Direct Mount Kit for probe lengths exceeding 15 feet (4.6 m). The riser mount should **not** be used in chemical or high heat applications without consulting factory.
